CARLOADINGS
OF
MONTANA AGRICULTURAL COMMODITIES
1916-1938

(Works Progress Administration Project No. 2595 O. P. No. 765-91-3-3)

Helena, Montana
September 1939

UNITED STATES DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

CARLOADINGS OF MONTANA AGRICULTURAL COMMODITIES,
1916-1938

There has been an increasing demand for basic agricultural statistics in recent years, along with the development of new highways, county planning boards, water conservation projects and other programs for agriculture. Among the demands for statistics relating to agricultural production and marketings, the demand for shipment data has occupied a prominent place. Many of the requests for statistics have asked for a breakdown of State totals into district and county totals in order that the statistics may be more closely related to programs organized on a district or county basis. At the same time the requests in large part have been for relatively long-time series. To partially meet these needs, the data presented in this bulletin relating to carloadings of Montana agricultural products were compiled under W. P. A. project number 2,595. The source of the data was the records of the Montana Railroad Commission, whose cooperation in this project is hereby gratefully acknowledged.

While the many needs of those using agricultural statistics for Montana are recognized, the limited funds that are available for the breakdown and publication of shipment data in detail must also be taken into account. In organizing these project data for publication it was decided to include all products (for which railroad shipment data are available) in State totals, by months and by years. The more important products were then selected for a county breakdown by years, and the less important products for a breakdown on a district basis in which the districts represent those groups of counties used as units by the Agricultural Marketing Service in estimating crop and livestock production. It was furthermore necessary to limit the number of years covered in the county and district series.

It is planned to publish another report from project number 2,595. It will show State and certain county and district statistics of agricultural production and will be compiled from the crop report records of the Agricultural Marketing Service.

Jay G. Diamond,
Senior Agricultural Statistician.
